

DAVID CARR

LOCKSMITHS & ALARMS

Welcome to your Ness M1 alarm.

Below are some quick tips on how to use your alarm (User manual attached):

To Arm: Press "Exit" **or** enter code (it will then say "Armed" at the top left of the screen and the count down to arm will begin)

To Disarm: Enter "your code" (it will then say "Disarmed" at the top left of the screen)

Emergency: Press "Emergency" and then press "Panic"

To change user codes please refer to the detailed manual.

Smartphone Connection

To view your alarm from your iPhone, Joe will be in contact to set up the App on your phone. Type in "EK Alarm" to download the App and it costs \$19.99. The app to download is EK Alarm (Red "eK" and a green "Alarm" with a black background). If you have an android smartphone the App is called ELK Droid.

Please note: if we have not originally set up your alarm to work on your smartphone, you will need the following.

Requirements to enable smartphone use for the systems above.

- public IP address (must be a Static IP)
- Router user name, password, brand of router
- Local IP range

We can arrange an IT company to set this up for you if you do not understand the above requirements. We will also need to return to your site to enable this function.

Back to Base Monitoring

If we have set up Back to Base Monitoring for your alarm, please speak to the monitoring centre, please call Onwatch on 1300 658 118 (24/7).

If you're having problems with your alarm, please call us on 02 9389 8543.

I hope you enjoy your new Ness M1 alarm.
